Registered Voter Omnibus
RV Omni 2026 January A - ReThink Media Toplines

YouGov

Sample	Online sample of 1,000 voters fielded from January 08 to January 09, 2026.
Margin of Error	±3.7%

1. Do you identify with any of the following political ideologies?

Asked of Independents, Republicans, and Unaffiliated voters

MAGA	18%
America First	21%
Both	31%
Neither	30%
Totals	100%
N	**519**

2. The U.S. and Russia together control almost 90% of the world's nuclear weapons. Yet the last remaining treaty limiting their nuclear weapons will expire on February 5, 2026. After this time, both countries will be free to build up as many nuclear weapons as they want for the first time in decades. Do you think a removal of all nuclear limits would make the U.S.:

A lot more secure	11%
Somewhat more secure	18%
Somewhat less secure	31%
A lot less secure	41%
Totals	101%
N	**1,000**

3. The U.S. and Russian governments have both said that removing all limits on their nuclear arsenals would be a problem. Russia has offered to continue observing previously-agreed-upon limits for another year, and President Trump has expressed interest in continuing to observe these limits but has not officially agreed.Should the U.S. accept Russia's offer to continue to limit both countries' nuclear weapons for at least another year?

Yes	87%
No	13%
Totals	100%
N	**1,000**

4. The U.S. and Russia each have over 5,000 nuclear weapons, and together they control almost 90% of the world's nuclear weapons. Going forward, which do you think is the best course of action for the U.S.?

Negotiate a new deal with Russia to further reduce both countries' nuclear weapons	57%
Negotiate a new deal with Russia that maintains current nuclear weapons levels for both countries	34%
Negotiate a new deal with Russia that allows both countries to increase their nuclear weapons levels	4%

Do not negotiate a new deal, allowing both countries to increase nuclear weapons levels without any limitations	5%
Totals	100%
N	**1,000**

5. Would you be [more or less] likely to vote for a political candidate that favors making a deal with Russia to maintain current limits on, or further reduce, both countries' nuclear weapons?

More likely	54%
Less likely	6%
This would make no difference in my vote	41%
Totals	101%
N	**1,000**

Registered Voter Omnibus
RV Omni 2026 January A - ReThink Media Toplines

This survey is based on 1,000 interviews conducted by YouGov on the internet of registered voters. The sample was weighted according to gender, age, race/ethnicity, education, and U.S. Census region based on voter registration lists, the U.S. Census American Community Survey, and the U.S. Census Current Population Survey, as well as 2020 Presidential vote and approximate 2024 Presidential vote based on available results, and party identification estimates based on Pew Research Center's National Public Opinion Reference Survey. Respondents were selected from YouGov to be representative of registered voters. The weights range from 0.16 to 6.02 with a mean of 1 and a standard deviation of 0.64.

The margin of error (a 95% confidence interval) for a sample percentage p based upon the subsetted sample is approximately 3.7%. It is calculated using the formula:

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + \mathrm{CV}^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
